About Us

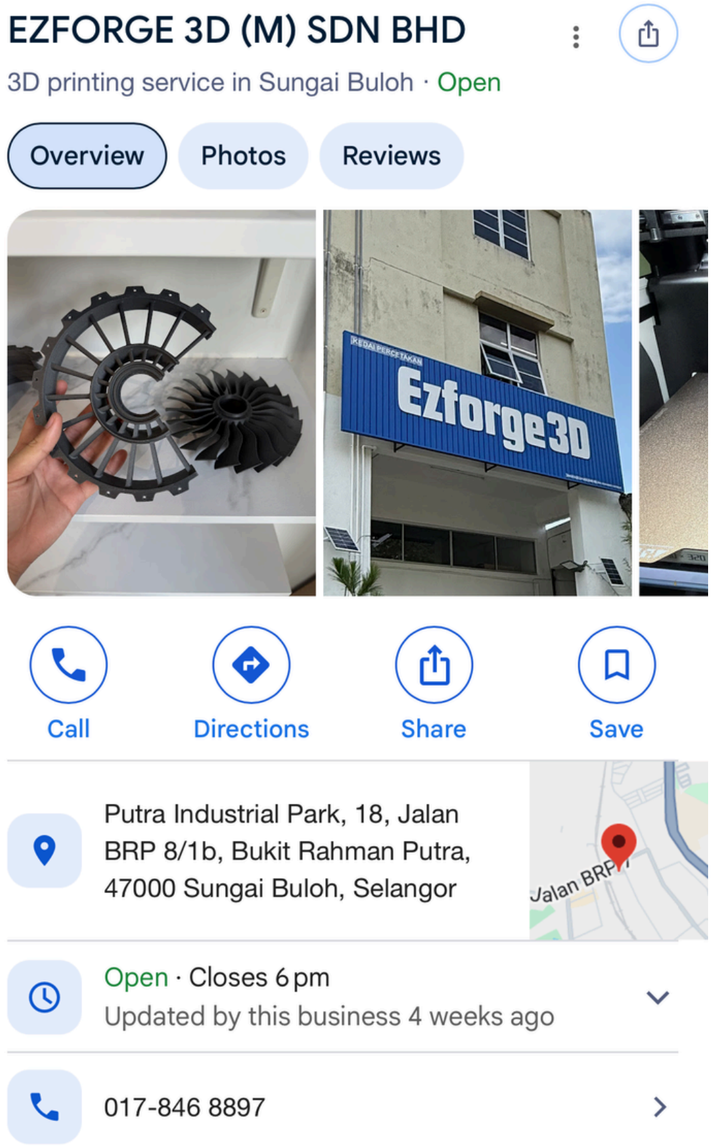

Ezforge was founded in August 2024 by **Soh Yit Lim**, a Mechatronic Engineering student who discovered his passion for innovation through **3D printing technology**. What began as a personal exploration soon evolved into a fast-growing creative manufacturing brand that bridges mechanics, design, and imagination.

Starting from a single 3D printer, Mr Soh mastered every step — from digital modeling and prototyping to precision production. Within just one year, Ezforge has expanded into a professional production farm with over **100 active machines.**

Ezforge became the **first Malaysian youth-led brand** to bring 3D printed creations to local markets, introducing the public to the possibilities of custom manufacturing and creative design.

Today, Ezforge is expanding into industrial part design, laser cutting, engraving, and customized production — bridging the worlds of technology and artistry.

Our Shop

📍 **PUTRA INDUSTRIAL PARK, 18, JALAN BRP 8/1B, BUKIT RAHMAN PUTRA, 47000 SUNGAI BULOH, SELANGOR.**

Mission & Vision

Our Vision

To become **Southeast Asia’s leading 3D printing and laser manufacturing brand**, shaping the future through design and technology.

Our Mission

- **Deliver high-precision, sustainable manufacturing solutions** using 3D printing and laser technologies
- **Build a creative platform** empowering young designers, makers, and entrepreneurs
- **Drive innovation in digital fabrication** for both industrial and lifestyle applications

Our Core Services

1 3D Printing Manufacturing & Wholesale

We operate high-performance FDM & SLA printers for small-batch production & provide wholesale 3D-printed toys, collectibles, and product samples.

2 Laser Cutting & Engraving

We offer professional CO_2 and fiber laser cutting/engraving on materials like wood, acrylic, metal & leather — ideal for:

- Customized corporate gifts
- Signage & branding installations
- Artistic designs & packaging
- DIY kits & event merchandising

3 Custom Sculpture & Display Fabrication

We design and fabricate large sculptures and installations for events, malls, exhibitions, and temples — from concept to finishing.

4 Industrial Parts & Mold Design

We design and 3D print custom mechanical components, fixtures, and prototype parts.
Also offer CAD drawing and mold design for production.

5 Retail Kiosk & Customer Experience

We operate branded kiosks offering ready-made and customized 3D-printed and laser-crafted products — blending tech, art, and retail.

Our Values

Design Thinking

We solve problems with empathy and aesthetics

Precision

We deliver quality without compromise

Transparency

We build honest relationships with our partners

Sustainability

We use efficient materials and processes

Our Future Direction

Phase 1

Launching Ezforge Toys – original designer toy series

Phase 2

Expanding Ezforge Custom & Industrial services

Phase 3

Opening Ezforge Maker Studio – an interactive retail + fabrication space

Phase 4

Partnering with schools to offer 3D printing & laser workshops

Building a nationwide creative production network

EZFORGE 3D (M) SDN. BHD.
